

Rudder Port Bearings - With Seals

Type F

PRODUCT OVERVIEW

The Tides Marine RPB Type F unit is designed to be installed in rudder tubes which have been laminated or welded into a vessel's hull.

The unit consists of a one-piece UHMW housing with a nitrile lip seal. It eliminates metal-to-metal contact and the associated problems of abrasion, electrolysis and corrosion. It is 100% watertight and eliminates chatter and vibration, resulting in a quieter, smoother operation.

Rudder Port Bearings - With Seals

Type F

BEFORE ORDERING

Design Note:

Type F Units – Diameter "B" must be at least equal to the rudder stock diameter plus 1 ½".

Tides Marine makes Type F assemblies based upon a combination of rudder stock diameter (.000") and the rudder tube I.D. When placing your order, please provide both of these dimensions.
